CSIC, through its Unit of Scientific Information Resources for Research (URICI), has signed agreements with some publishers to support authors during OA publication. Thanks to these agreements, CSIC authors who wish to publish in OA benefit from total or partial financing from the APC (Article Processing Charges) depending on the publisher.

Any question? Please contact: ayudaopenaccess@bib.csic.es

For further information, have a look at the FAQs on OA publishing support in CSIC

Requirements to request funding

The "contact / corresponding author" of the article for which the grant is requested must appear in the corporate directory of the CSIC Intranet as internal staff (not mixed or external), and have a contractual relationship with CSIC.

CSIC Author Affiliation

CSIC authors who sign the article for which a grant is requested, must clearly identify themselves in their affiliation data in the article as belonging to the institution.

Correo CSIC

Have an email account with domain.csic, to communicate both with URICI and with the journal in which you want to publish or, if you do not have one, guarantee / demonstrate the author’s affiliation with CSIC.

100% funding

- American Chemical Society
- Blackwell Science - Portland Press
